

Table of Contents

Chapter 1 Introduction.....	1-1
1.1 Overview	1-1
1.1.1 Purpose.....	1-1
1.1.2 Classification of Cover Systems.....	1-3
1.1.3 Organization of Document	1-7
1.2 Closure Regulatory Requirements.....	1-7
1.2.1 MSW Landfill Cover Systems.....	1-7
1.2.2 Hazardous Waste Landfill Cover Systems.....	1-10
1.2.3 Solid Waste Landfill Cover System Performance	1-11
1.2.4 CERCLA Site Cover Systems	1-12
1.2.5 Liquids Management Strategy	1-13
1.2.6 Design Life	1-15
1.2.7 Other Regulatory Requirements	1-15
1.3 Alternative Design Concepts and Materials	1-16
1.4 Gas Management Requirements	1-18
1.5 Typical Cover Systems Components.....	1-21
1.5.1 Surface Layer.....	1-21
1.5.2 Protection Layer.....	1-21
1.5.3 Drainage Layer.....	1-22
1.5.4 Hydraulic Barrier	1-23
1.5.5 Gas Collection Layer.....	1-23
1.5.6 Foundation Layer	1-24
1.6 Design Criteria Development and Conceptual Design.....	1-24
1.6.1 Overview	1-24
1.6.2 Regulatory Requirements	1-25
1.6.3 Climatic Criteria.....	1-25
1.6.4 Physical and Engineering Criteria	1-25
1.6.5 Aesthetic and Land Use Criteria	1-27
1.6.6 Ecological Criteria	1-28
Chapter 2 Individual Components of Cover Systems.....	2-1
2.1 Introduction.....	2-1
2.2 Surface Layer	2-1
2.2.1 General Issues	2-1
2.2.2 Elements of Design	2-2
2.2.2.1 Slope Inclination	2-2
2.2.2.2 Materials	2-4
2.2.2.2.1 Topsoil	2-4
2.2.2.2.2 Amended Topsoil.....	2-5
2.2.2.2.3 Soil-Gravel Mixture	2-6
2.2.2.2.4 Gravel Veneer.....	2-6
2.2.2.2.5 Riprap	2-7
2.2.2.2.6 Asphaltic Concrete	2-8
2.2.2.2.7 Other Materials	2-9

2.2.2.3	Thickness	2-9
2.2.3	Vegetation	2-10
2.2.4	Surface-Water Control	2-13
2.2.5	Erosion Protection.....	2-18
2.2.5.1	Overview.....	2-18
2.2.5.2	Nature of Erosion.....	2-19
2.2.5.3	Short-Term and Long-Term Erosion.....	2-21
2.2.5.4	Sheet and Rill Erosion	2-23
2.2.5.4.1	Universal Soil Loss Equation.....	2-23
2.2.5.4.2	Water Erosion Prediction Project (WEPP) Model	2-24
2.2.5.5	Gully Erosion	2-25
2.2.5.5.1	Overview.....	2-25
2.2.5.5.2	Tractive Force Method for Vegetated Surface Layers	2-26
2.2.5.5.3	Horton/NRC Method for Vegetated Surface Layers	2-26
2.2.5.5.4	Permissible Velocity Method for Vegetated Surface Layers.....	2-27
2.2.5.5.5	Stephenson Method for Gravel or Riprap Surface Layers.....	2-28
2.2.5.6	Wind Erosion	2-29
2.2.5.6.1	Revised Wind Erosion Equation	2-29
2.2.5.6.2	Wind Erosion Prediction System	2-30
2.2.5.7	Erosion Control Materials	2-30
2.2.5.7.1	Temporary Erosion Control Materials	2-30
2.2.5.7.2	Permanent Erosion Control Materials.....	2-31
2.2.6	Construction	2-32
2.2.7	Maintenance.....	2-33
2.2.8	Monitoring	2-33
2.3	Protection Layer.....	2-33
2.3.1	General Issues	2-34
2.3.2	Elements of Design	2-34
2.3.2.1	Materials	2-34
2.3.2.2	Thickness	2-35
2.3.2.2.1	Desiccation Protection	2-36
2.3.2.2.2	Frost Penetration Protection	2-36
2.3.2.2.3	Accidental Human Intrusion Protection.....	2-38
2.3.2.2.4	Root Penetration Protection.....	2-39
2.3.2.2.5	Burrowing Animal Protection	2-40
2.3.2.2.6	Vegetation Support.....	2-41
2.3.2.2.7	Water Storage.....	2-41
2.3.2.2.8	Radon Attenuation.....	2-44
2.3.3	Construction	2-44
2.3.4	Maintenance.....	2-45
2.3.5	Monitoring	2-45
2.4	Drainage Layer	2-45
2.4.1	General Issues	2-45
2.4.2	Elements of Design	2-46
2.4.2.1	Materials	2-46
2.4.2.1.1	Granular Materials	2-46
2.4.2.1.2	Geosynthetics	2-48

2.4.2.2	Thickness of Granular Layers.....	2-50
2.4.2.3	Required Flow Capacity	2-50
2.4.2.4	Drainage Layer Outlets.....	2-52
2.4.3	Construction.....	2-52
2.4.4	Maintenance.....	2-52
2.4.5	Monitoring	2-52
2.5	Hydraulic Barrier.....	2-53
2.5.1	General Issues	2-53
2.5.2	Elements of Design	2-53
2.5.2.1	Materials	2-54
2.5.2.1.1	GMs	2-54
2.5.2.1.2	GCLs.....	2-55
2.5.2.1.3	CCLs.....	2-59
2.5.2.2	Thickness	2-60
2.5.2.2.1	GMs	2-60
2.5.2.2.2	GCLs.....	2-60
2.5.2.2.3	CCLs.....	2-61
2.5.2.3	Percolation.....	2-61
2.5.2.4	Gas Containment.....	2-63
2.5.2.5	Differential Settlement	2-63
2.5.2.6	Wet-Dry Cycles.....	2-65
2.5.2.7	Freeze-Thaw Cycles.....	2-66
2.5.2.8	Shear Strength	2-67
2.5.2.9	Accidental or Intentional Puncture	2-70
2.5.2.10	Anticipated Lifetime	2-70
2.5.2.10.1	GMs	2-70
2.5.2.10.2	GCLs.....	2-72
2.5.2.10.3	CCLs.....	2-73
2.5.3	Composite Hydraulic Barriers	2-73
2.5.3.1	Prompt Placement of Overlying Materials	2-74
2.5.3.2	Intimate Contact	2-74
2.5.4	Construction.....	2-75
2.5.5	Maintenance.....	2-76
2.5.6	Monitoring	2-77
2.6	Gas Collection Layer	2-77
2.6.1	General Issues	2-77
2.6.2	Elements of Design	2-78
2.6.2.1	Materials	2-78
2.6.2.1.1	Granular Materials	2-78
2.6.2.1.2	Geosynthetics.....	2-79
2.6.2.2	Thickness of Granular Layers.....	2-80
2.6.2.3	Required Flow Capacity	2-80
2.6.3	Gas Collection Layer Outlets	2-80
2.6.4	Construction.....	2-81
2.6.5	Maintenance.....	2-81
2.6.6	Monitoring	2-81
2.7	Foundation Layer.....	2-81
2.7.1	General Issues	2-81
2.7.2	Elements of Design	2-82
2.7.2.1	Materials	2-82
2.7.2.2	Thickness	2-83

2.7.3	Construction.....	2-83
2.7.4	Maintenance.....	2-83
2.7.5	Monitoring	2-83
2.8 Examples of Cover Systems for Different Applications	2-83	
Chapter 3 Alternative Design Concepts and Materials.....	3-1	
3.1 Introduction.....	3-1	
3.2 ET Barrier Design.....	3-3	
3.2.1	Overview	3-3
3.2.2	General Issues	3-6
3.2.3	Elements of Design.....	3-6
3.2.4	Design Concept.....	3-6
3.2.5	Soil Thickness.....	3-7
3.3 Capillary Barrier Design.....	3-8	
3.3.1	Overview	3-8
3.3.2	General Issues	3-10
3.3.3	Elements of Design.....	3-10
3.3.4	Design Concept.....	3-11
3.3.5	Coarser-Grained Soil Layer	3-13
3.3.6	Internal Stability.....	3-14
3.4 Alternate Design Performance Evaluation	3-14	
3.4.1	Introduction	3-14
3.4.2	Numerical Modeling	3-15
3.4.3	Performance Monitoring.....	3-16
3.4.4	Natural Analogs.....	3-17
3.5 Construction of Alternative Designs	3-20	
3.5.1	Compaction Requirements.....	3-20
3.5.2	Capillary Barrier Soil Interfaces.....	3-20
3.6 Maintenance and Monitoring of Alternative Designs.....	3-21	
3.6.1	Maintenance.....	3-21
3.6.2	Monitoring	3-21
3.7 Alternative Materials.....	3-22	
3.7.1	Geofoam	3-22
3.7.2	Shredded Tires.....	3-22
3.7.3	Sprayed Elastomers.....	3-25
3.7.4	Paper Mill Sludges	3-26
Chapter 4 Hydraulic Analysis and Design	4-1	
4.2 Introduction.....	4-1	
4.2 Characteristics of Water Balance Models	4-1	
4.2.1	Overview	4-1
4.2.2	Water Balance Concept	4-1
4.2.3	Water Balance Methods.....	4-3
4.2.3.1	Simplified Manual Method	4-4
4.2.3.2	HELP	4-10
4.2.3.3	LEACHM Model.....	4-13
4.2.3.4	UNSAT-H	4-14
4.2.3.5	SoilCover	4-15

4.2.3.6	HYDRUS-2D.....	4-18
4.3	Evaluation of Water Balance Models	4-19
4.3.1	Overview	4-19
4.3.2	Lysimeters at DOE Hanford Site	4-19
4.3.3	Test Plots at Hill Air Force Base	4-23
4.3.4	Test Plots in Live Oak, Georgia and Wenatchee, Washington	4-27
4.4	Recommendations for Application of Water Balance Models	4-32
4.5	Design of Drainage Layers	4-34
4.5.1	Simplified Manual Method.....	4-34
4.5.2	Refinement to Simplified Manual Method	4-37
4.5.3	HELP Model.....	4-38
4.6	Design of Slope Transitions	4-39
4.7	Design of Filter Layers	4-42
4.7.1	Overview	4-42
4.7.2	Soil Filters	4-42
4.7.3	GT Filters	4-42
Chapter 5	Gas Analysis and Design.....	5-1
5.1	Introduction.....	5-1
5.2	Mechanisms of Gas Generation and Emission.....	5-1
5.2.1	Overview	5-1
5.2.2	MSW Landfill Gas Generation.....	5-2
5.2.3	Gas Emissions	5-6
5.3	Characteristics of Selected Gas Emission Models.....	5-8
5.3.1	LandGEM Model for MSW	5-8
5.3.2	Diffusion Model for Emissions of Organic Vapors.....	5-9
5.4	Design of Gas Collection Systems	5-9
Chapter 6	Geotechnical Analysis and Design.....	6-1
6.1	Introduction.....	6-1
6.2	Static Slope Stability	6-1
6.2.1	Overview	6-1
6.2.2	Limit Equilibrium Analyses	6-3
6.2.2.1	Overview	6-3
6.2.2.2	Infinite Slope	6-4
6.2.2.3	Slope of Finite Length.....	6-7
6.2.3	Stress-Deformation Analyses.....	6-12
6.2.4	Shear Strength Parameters	6-13
6.2.5	Construction Considerations.....	6-19
6.2.6	Factors of Safety	6-19
6.3	Seismic Slope Stability and Deformation	6-25
6.3.1	Overview	6-25
6.3.2	Seismic Hazard Evaluation	6-26
6.3.3	Seismic Response Analysis	6-30
6.3.3.1	Introduction.....	6-30
6.3.3.2	Material Properties Selection.....	6-30
6.3.3.3	Simplified Response Analysis	6-33

6.3.3.4	Analytical and Numerical Response Analyses	6-35
6.3.4	Dynamic Shear Strength	6-37
6.3.5	Seismic Stability and Deformation Analysis	6-37
6.3.5.1	Overview	6-37
6.3.5.2	Pseudo-Static Factor of Safety Method	6-37
6.3.5.3	Modified Pseudo-Static Factor of Safety Method	6-38
6.3.5.4	Permanent Seismic Deformation Method	6-40
6.3.5.5	Seismic Deformation Performance Criteria	6-43
6.4	Settlement	6-45
6.4.1	Mechanisms of Settlement.....	6-45
6.4.2	Settlement of Foundation Soils	6-45
6.4.3	Overall Waste Compression	6-46
6.4.4	Differential Settlement Due to Localized Mechanisms.....	6-49
6.4.5	Impacts of Settlement on Cover Systems	6-50
6.5	Steep Slopes	6-51
6.5.1	Introduction	6-51
6.5.2	Waste Buttress.....	6-51
6.5.3	Steep Cover System Slopes	6-58
6.6	Soft Waste Materials	6-60
Chapter 7 Lessons Learned		7-1
7.1	Introduction.....	7-1
7.2	Soil Barriers	7-2
7.2.1	Test Plots in Omega Hills, Wisconsin	7-2
7.2.2	Test Plots in Kettleman City, California.....	7-5
7.2.3	Cover Systems in Maine	7-6
7.2.4	Test Plots in Live Oak, Georgia and Wenatchee, Washington	7-8
7.2.5	Test Plots in Hamburg, Germany	7-8
7.2.6	Test Plots in Albuquerque, New Mexico	7-12
7.2.7	Test Plots in Los Alamos, New Mexico	7-15
7.3	GM Barriers	7-16
7.3.1	Percolation through GM Barriers.....	7-16
7.3.2	GM Barrier Seam Problem Due to Contamination	7-17
7.3.3	GM Barrier Seam Problem Due to Moisture	7-18
7.3.4	Temperature Fluctuations During GM Installation.....	7-18
7.3.5	Fate of GM Wrinkles	7-20
7.4	Slope Stability.....	7-22
7.4.1	Overview	7-22
7.4.2	Cover System Slope Failure During Construction.....	7-22
7.4.3	Cover System Slope Failure After Rainfall or Thaw.....	7-23
7.4.4	Soil Cover Damage Due to Earthquakes	7-29
7.4.5	Results of EPA GCL Test Plots.....	7-30
7.5	Waste Settlement.....	7-37
7.6	Stormwater Management and Erosion Control.....	7-39
7.6.1	Failure of Erosion-Mat Lined Downchute	7-39
7.6.2	Excessive Erosion and Gullying	7-40
7.6.3	Failure of Surface-Water Runoff Collector	7-42
7.7	Gas Pressures	7-44

7.8 Miscellaneous Problems.....	7-46
--	-------------

Chapter 8 Performance Monitoring	8-1
 8.1 Introduction.....	8-1
 8.2 Infiltration Monitoring	8-3
8.2.1 Overview	8-3
8.2.2 Leachate Collection System Monitoring.....	8-3
8.2.3 Drainage Layer Monitoring.....	8-4
8.2.4 Lysimeter Monitoring.....	8-5
 8.3 Soil Moisture Monitoring	8-7
8.3.1 Overview	8-7
8.3.2 Neutron Probes	8-8
8.3.3 Time Domain Reflectometry.....	8-10
8.3.4 Frequency Domain Reflectometry.....	8-12
8.3.5 Tensiometers	8-13
8.3.6 Electrical Resistance Sensors	8-14
8.3.7 Thermocouple Psychrometers	8-16
8.3.8 Heat Dissipation Sensors.....	8-16
 8.4 Gas Emissions Monitoring	8-17
 8.5 Settlement Monitoring.....	8-19
Chapter 9 Maintenance and Long-Term Issues	9-1
 9.1 Introduction.....	9-1
 9.2 Cover System Maintenance	9-8
9.2.1 Overview	9-8
9.2.2 Vegetation-Related Maintenance.....	9-9
9.2.3 Erosion-Related Maintenance.....	9-9
9.2.4 Subsidence-Related Maintenance	9-9
9.2.5 Other Surface Layer Related Maintenance	9-10
9.2.6 Drainage Layer Related Maintenance	9-10
9.2.7 Maintenance of Surface-Water Management System	9-10
9.2.8 Maintenance of Cover Monitoring System	9-11
 9.3 Site End Use.....	9-11
9.3.1 Overview	9-11
9.3.2 Ecological Reuse	9-12
9.3.3 Recreational Reuse.....	9-12
9.3.4 Industrial and Commercial Reuse	9-13
9.3.5 Case Histories.....	9-15
